

# COMPANY PROFILE

## 1. INTRODUCTION

**T2-Tech African Management Group (Pty) Ltd** (hereinafter referred to as “**T2-TECH AFRICA**”) is a holding company registered in the Republic of South Africa in September 2009.

**T2 TECH AFRICA** is a multi-disciplinary engineering and management firm (via civil, structural, mechanical, and architectural), as well as property management and investment, events management, transportation, plant and equipment hire, environmental studies, social facilitation services and training.

**T2 TECH AFRICA**, in association with reputable companies, provides its customers/clients with proven engineering and management performance in programme/project management, civil and structural designs, housing project management, environmental studies and social facilitation.

## 2. BACKGROUND

**T2 TECH AFRICA** was born out of the realisation by founding member that unless the previously disadvantaged entities join hands together to utilise customised western technology and expertise with an African perspective, prospects for economic growth and development will be minimal.

The quality of service rendered by individual members **T2 TECH AFRICA** over the years in their different environment and the breadth of the experience gained have been harnessed together and is evidenced through successful projects that have been undertaken by the individual members in their respective and previous environments.

**T2 TECH AFRICA** is, therefore, uniquely positioned to provide technical (construction) and professional services that are pertinent to both rural and urban communities in Africa.

## 3. VISION

**T2 TECH AFRICA** strive to be recognised as one of the leading world class engineering and management business organisation in its core business of activities, both within South Africa and Internationally, promoting and encouraging capacity building, development and skills transfer, and offering better services and sustainable development to african communities.

## 4. MISSION

The vision of **T2 TECH AFRICA** drives the company towards the fulfilment of the mission that of becoming a world class engineering and management organisation that will succeed in the market place through the delivery of technology and community based sustainable development.

## 5. OBJECTIVES

**T2 TECH AFRICA** has adopted as its main object and main business, engineering consulting (civil, electrical, mechanical, structural), project/programme management, contract management, construction management, environmental management, mining and social facilitation, as follows:

- 5.1. the provision of cost effective engineering project management and consulting services on small and medium sized industries;
- 5.2. to uplift the african communities in rural areas by providing them with:
  - (a) job opportunities in mining and construction;
  - (b) clean drinkable water;

# COMPANY PROFILE

- (c) proper housing and sanitation;

- Competency - We believe in creating competency through innovative programmes;
- Promptness - We are committed in the delivery of service right on schedule;
- Honesty - We acknowledge the premium of trust bestowed upon by its clients; and
- Confidentiality - Confidentiality is one of our strongest virtues.

## 7. MANAGEMENT PHILOSOPHY

7.1. **T2-TECH AFRICA's** philosophy is "Integrated Technology and Sustainable Development". This philosophy is derived from co-operation of teamwork, both within the organisation and between the organisation and its customers. Better quality services and complete customer satisfaction are of paramount importance. **T2-TECH AFRICA** endorses and practices quality management systems based on South African acceptable standards. Management system in practice is geared towards satisfying the overall quality objectives of **T2-TECH AFRICA**. Extraordinary commitment of every member of **T2-TECH AFRICA** and its customers is a priority.

7.2. The corner-stone of our existence and success is to develop a winning team that will understand the needs of people, generate new ideas and solving development orientated problems with the relevant communities. This is achieved by optimising the time, cost and quality aspects of any project into a unified whole, and the provision of opportunities to the disadvantaged communities through:

- (a) capacity building;
- (b) significant public participation;
- (c) basic services; and
- (d) job creation.
